Burundi

## Country Profile : Executive Summary

Version : May 2024

This HIV Analytics for Sustainability Planning country profile executive summary is meant to provide a concise yet broad overview of an array of critical measures and indicators that are related to the country’s HIV response. These include data tables and graphics describing the characteristics of the country’s HIV epidemic, along with key fiscal and macroeconomic metrics, and broader health systems spending figures. The executive summary has been crafted to offer a quick and accessible understanding of these key metrics to inform strategic planning.

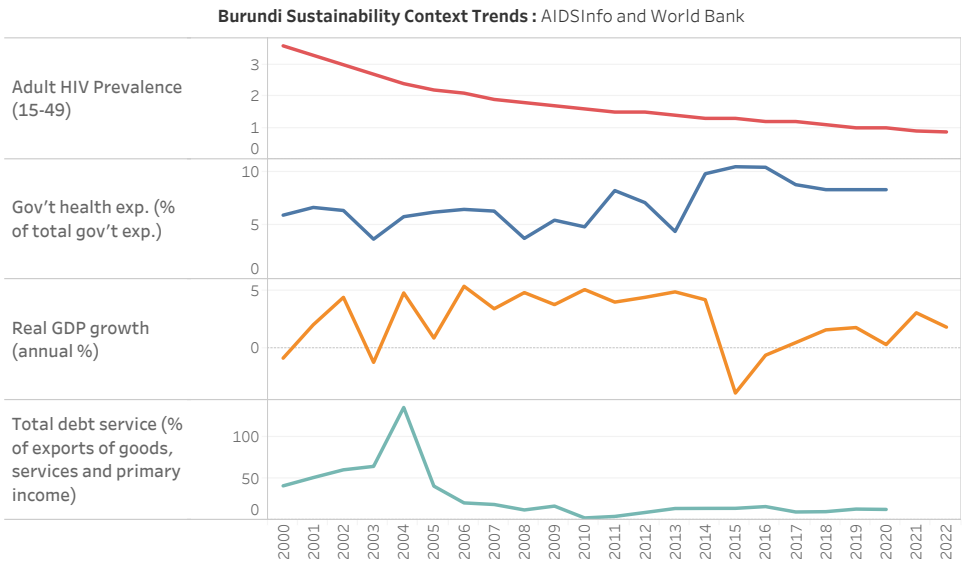

This resource has been developed through the aegis of the HIV Resource Alignment initiative, which is a joint collaboration between the US President’s Emergency Plan for AIDS Relief (PEPFAR), the Global Fund for AIDS, Tuberculosis, and Malaria (the Global Fund), and the United Nations Joint Programme on HIV/AIDS (UNAIDS). The collaboration provides granular data to enable a better understanding of HIV investments across funders, improves transparency, accountability, and efficiency of resource allocation, and ensures strategic alignment for maximizing the value of available resources for sustainability of the HIV/AIDS response.

## Country Profile : Executive Summary

HIV Financing Data includes disaggregation by funder, program area, etc. Note that budget data may not be available for all funding sources (e.g., Domestic Gov't). Where no value or \$0 appears, this should not necessarily be interpreted as no contribution, but likely represents a data gap.

### Overall HIV Funding

Burundi Trend in Total Program Expenditures by Funder

	PEPFAR	Global Fund	Domestic Gov't	Other Funders
2018	\$15.0M	\$6.5M	\$1.6M

Domestic Government data are less available than PEPFAR or Global Fund data for both budgets and expenditures. Domestic Government budget data for 2018-2023 are primarily based on the funding landscape table submissions to the Global Fund as part of the access to funding requests. Note that the implementation timeframe for each country varies based on that country's fiscal year, and that data for (HIV) Care and Treatment may include antiretroviral (ARV) drug budgets and/or expenditures where disaggregated data are not available. During the PEPFAR 2021 through 2023 Country/Regional Operational Planning (COP/ROP), these data were examined carefully, with their completeness checked and verified, where possible, in consultation with the partner country teams. Where available, program management data at the Implementation Level represents program management and coordination.
